

PROGRAM SAMPLE

NATURE TREKS

Plants, animals and cultural ecosystems come alive as students explore and interact with science concepts and the shared teachings of Indigenous peoples.

OUTDOOR SKILLS

Students engage in engineering practices, while building confidence in the outdoors through fire-making, cooking and shelter-building.

CHALLENGE EDUCATION

Our Challenging Outdoor Personal Experience (C.O.P.E) combines team-building initiative games, challenge course elements and social-emotional learning (SEL) benchmarks.

ABOUT US

The Cedar Outdoor School is your home of discovery! We aim to make outdoor learning accessible for students and easy for schools. With 3 camp properties to choose from and lots of available dates during peak camping months, we can design an exceptional program that's perfect for your school!

OUR VISION

To foster connections with the natural world through experience

WHY CHOOSE US

We work with you to design a custom program. We offer an all-inclusive experience or build your own package to include everything from overnight lodging & meal service to programming & medical staff. The entire planning process is made to be easy, affordable, organized and flexible.

OUTDOOR ACADEMICS

We employ certificated WA state educators and work with curriculum partners across the state to build our standards-aligned curriculum. We value active, student-led learning that builds a sense of place and appreciation for the outdoors in our youth.

RECREATION

The Cedar Outdoor School is home to the true camping experience from climbing, challenge courses and archery to orienteering, fire-building and more. Our staff train extensively to ensure a safe and welcoming learning environment where personal growth is made possible!

Our camps are owned and operated by the Chief Seattle Council, Scouting America.

GROUNDING EDUCATION

The Cedar Outdoor School is situated among pristine natural settings, ripe with opportunities for student discovery! Our multiple properties feature hundreds of acres of preserved wetlands, forests and marine environments where students learn through experience and can feel safe in doing so.
