Our program perfectly blends outdoor learning and recreational activities. Lessons in environmental study and outdoor skills are designed by certificated teachers with input from curriculum partners across the state. We make a plan with each school to design a program that meets their goals.

***The Perfect Pair –
Outdoor Education & Recreation***

Our outdoor school is a home for discovery—of place, of self, and each other. The offerings below are just the beginning of how state standards, interdisciplinary learning, and impactful approaches to learning will intersect during your stay at the Cedar Outdoor School!

***The Cedar Outdoor School is approved program of Washington State.

Program Evaluation Data & Feedback:

100% of 34 respondents surveyed last Spring said they would recommend the Cedar Outdoor School to other teachers and schools.

97% of students surveyed said they would recommend the Cedar Outdoor School to other students.

5th grade teacher: “Students are still buzzing about their wonderful outdoor experiences. They raved about the food, were proud of their rock wall climbing experiences, and are recognizing trees around our school (even if they can't recall specific names).”

5th grade student: “The food was amazing it tasted like a meal that your parents would make or a meal from a restaurant, I also think that the activities were fun, and the camp hosts and workers were very kind and fun!”

Elementary principal: “This experience not only taught students about the beautiful natural world of the Pacific Northwest but it also created memories and friendships that will last a lifetime”

Elementary teacher: “This was my first time at Cedar Outdoor School and I’m very impressed. Every child in WA should have this experience. Our students live in the area, but it was exciting and educational for them!”

5th grade student: “I really liked the food and how we could chose to help set up for the meals, I also really liked the rock wall because it was challenging but when you reached the top it felt so rewarding to ring the bell.”

5th grade teacher: “For many, this was their first experience in a camp atmosphere. The cooperative activities and supportive atmosphere helped them build confidence and desire to take risks and be a part of a team”

5th grade parent: “This has been a peak experience for many of the kids. I’ve heard so many great comments from the students who have been having fun and staying engaged. We need more of this!”

5th grade teacher: “Students are learning both teamwork and independence by spending time in an unfamiliar environment. These skills transfer far beyond the classroom, equipping them to be versatile humans in a diverse world.”

5th grade parent: “This program fostered teamwork and comraderie amongst the kids. They were never bored, all engaged, hopefully they were reminded that they still love to play and don’t need to rely on their devices”
